

# Hinged ADJUSTABLE DEPTH WALL MOUNT BRACKET

**✓ IN STOCK**

*Easy  
Access*

## FEATURES

These **Hinged Adjustable Depth Wall Mount Brackets** used for installing standard 19-inch patch panels, switches and other rack mounted networking equipment in network wiring closets, back offices and other areas where you're doing the job with limited floor space.

The depth is adjustable between 8 and 13 inches so it can accommodate equipment of varying depth. The wall mount bracket is designed to facilitate airflow, and its hinged rail feature gives you easy access to install, configure and service your equipment.

Constructed from heavy-duty cold rolled steel with a classic black powder coated finish, this wall mount bracket delivers exceptional utility and durability and is available in a variety of sizes. All hardware for trouble-free assembly, wall and equipment mounting hardware is included. This rack accommodates stationary weight loads up to 40 lbs.
